# CCTV SOLUTIONS FOR HAZARDOUS AREAS

Pre-configured bundles for industrial application

# R. STAHL CCTV BUNDLES

## FOR ALL YOUR CCTV APPLICATIONS

Our bundle concepts are a fast and efficient way to create your individual CCTV solution in hazardous areas Zone 1, 2, 21, 22 and in safe industrial areas.

The S, M and L bundles make getting started easy – even for applications with sophisticated requirements.

We create the best CCTV solution for your system from a single source, regardless of the manufacturer - customised to meet all national and international data protection requirements.

### Your benefits:

- Standardised solutions for hazardous areas.
- Defined bundle solutions suitable for every type of application – all from one source.
- Suitable for indoor and outdoor areas with temperatures ranging from -60 °C to +60 °C / -76 °F to +140 °F.

- Alarm management
- Advanced User Management
- Card visualisation
- AI-supported analysis for person, fire or smoke detection, and more
- Privacy masking
- Redundant power supply
- Tested network cabinet with maintenance monitor
- KVM extender (100 m)

## DATA PROTECTION ACCORDING TO THE EU GENERAL DATA PROTECTION REGULATION

# OUR HIGHLIGHTS

## DATA PROTECTION ACC. TO GDPR

To reduce the level of identification, individual persons or system parts can be pixellated.

## PRE-CONFIGURED PLUG & PLAY SYSTEM

All of our solutions are fully tested and configured with all individual settings.

## CYBER SECURITY

Our solutions meet all current requirements for IT security.

## AI ANALYSIS

The software managements systems we use come with powerful AI support for proactive hazard detection. Key functions such as person detection in hazardous areas, detection of PPE violation and falls, as well as fire and smoke detection can be ordered as individual modules of the video management software.

## DOCUMENTATION PACKAGES

We have three different packages on offer: BASIC, COMFORT and EXTENDED. On request we can also design customised documentation packages as well as workshops and product training.

## EXISTING CAMERAS

Our flexible systems can integrate almost any type of camera – get in touch to find out more.

## ADDITIONAL SERVICES AND PRODUCTS

### REMOTE HMI V7

Camera images integrated into the process image with our REMOTE HMI firmware.

### FO DATA TRANSMISSION

For great distances outdoors.

### WIFI SOLUTIONS

Versatile WiFi solutions for Zone 1, 2.
