

- Cost- and space-saving system for HART communication
- Different variants available with or without signal conversion
- Easy to install on DIN rails

**MY R. STAHL 9196A**

Used in combination with the HART multiplexer (9192), the 9196 series HART termination board enables the transmission of data using the HART protocol between field devices and an asset management system. The boards are very easy to install on DIN rails and can process 4 to 20 mA signals with HART FSK. If Ex i separation is necessary, this will require separate Ex i isolators.
