

Isolator Barriers

Binary output

Ex i field circuit

9275/10-21-25-11s Art. No. 261434

- Space savings due to a slim design – 12.5 mm wide
- Can be used for functional safety levels up to SIL 3 (IEC/EN 61508)
- Offers line fault detection with signalization
- For interface with solenoid valves and LEDs

MY R. STAHL 9275A

Series 9275 digital outputs issue signals for the intrinsically safe operation of Ex i solenoid valves, indicator lamps or horns. The devices feature three-way galvanic separation.
