

USE OF THE VARIOUS COLOURS:

Red	General warning and for left/right identification in ports
Yellow	Spectrum without any blue light, e.g. in the pharmaceutical and photography industry and for environmental protection
Green	Eyewash stations and safety showers
Blue	For marking fire extinguishing equipment, e.g. in the chemical industry
Warm white (4000K)	Interior lighting; lamp code 840, specially for Scandinavia
Neutral white (5000K)	Standard light colour for all applications
Cold white (5700K + 6500K)	High brilliance, preferred in Asia and Southern Europe
